Our product design and development team is always proactive

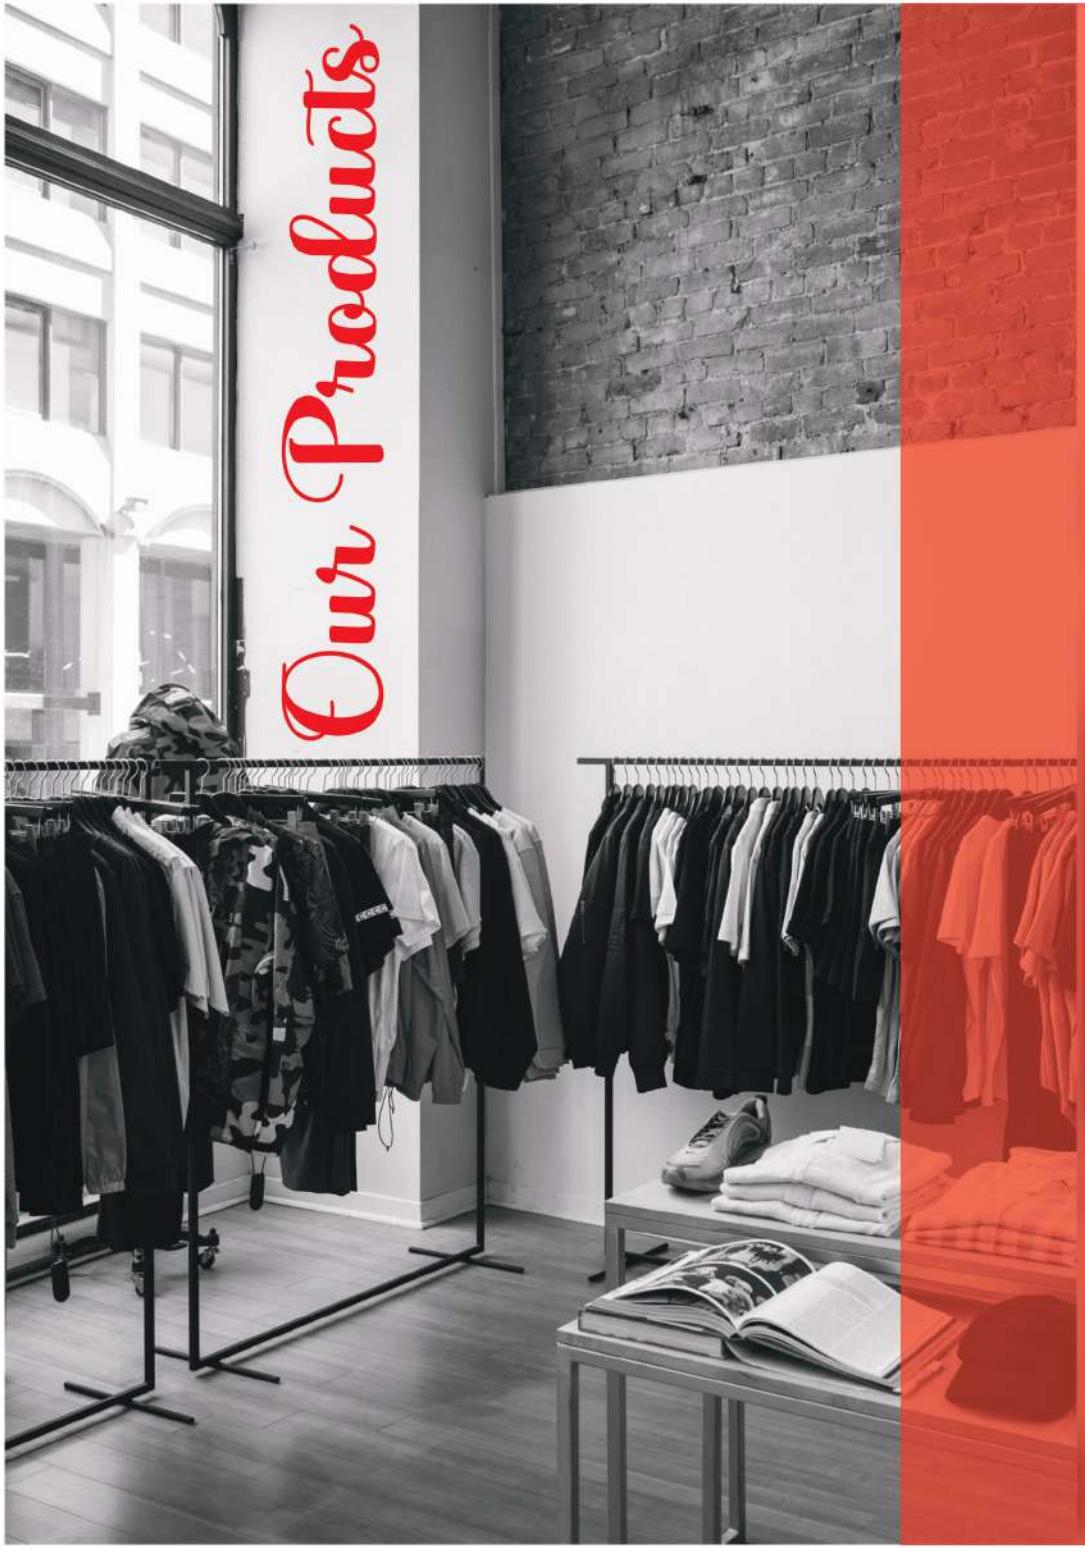

Quality
Control & Assurance

Crystal Buying & Sourcing puts a lot of emphasis on quality products and quality management. Therefore, the planned and systematic activities are implemented in a quality system so that quality requirements for the garments are fulfilled. Our Quality Assurance also includes management of the quality of raw materials, fabric and color composition, products and components, services related to production, and management, production and inspection processes.

Tested quality control processes along with inspections at regular intervals allow us to deliver orders on time and within the required quality standard (AQL 1.0 – 4.0).

We enforce standards from the start – fabric, trims, processing (printing + dyeing), lab testing (physical + chemical), patterns & fitting, washing, finishing, packing, in-line (10% packed), mid-line (50% packed), final (100% packed).

Our team includes specialized controllers for each different and specific product category. Our controller's base experience comes from having manufactured the products by themselves and knowing everything there is to know about them.
